Stephen:

Thank you for the CD of the progress reports. We are meeting this week to discuss how we are going to proceed in light of Ms. Bergner's and NORCO's decision not to go forward with the cleanup or assessment activities. We will likely be asking Mr. Bergner for all of the files/data associated with activities. If interested, I will let you know what is happening. Do you happen to know the estimated quantities/volume of materials in the remaining tanks? Do you have a copy of the waste profile for each of the tanks for sludge and water? Do you have anything else that you think would be useful should EPA have to go forward and finish the cleanup?

Thanks for all you work on this project.
